

Advisor Classic Alpha Pager

Communications on the move

Ultimate Flexibility

The TH Comms Advisor can receive messages of up to 240 characters in length and the 4-line screen displays 80 characters at a time. The 6,400 character memory can hold up to 40 messages, automatically tagging them with the time and date. Special messages can be stored in the Personal Message File.

Greater Versatility

For absolute discretion the Advisor can be programmed to alert you silently to an incoming message or you can select from a range of audible alerts.

Faster Communication

The Advisor pager can be connected to any network pending frequency. If you connect to the PageOne network, you can rely on your message coming through in seconds because PageOne uses advanced satellite technology to send the message to transmitter sites across the country and through to you.

Easy To Use

To send a message, callers simply dial the 24-hour Paging Call Centre, quote your pager number and leave the message with the Call Centre operator.
