

## Aurora Alphanumeric Pager

### Communications on the move

#### Ultimate Flexibility

The TH Comms Aurora or Scriptor Jazz as it is also known is part of the TH Comms Calling Party Pays (CPP) product range. The pager is a smart and compact 2-line message pager, that can receive messages of up to 100 characters in length and the memory can hold up to 20 messages, automatically tagging them with the time and date.

#### Greater Versatility

For ultimate discretion the TH Comms Aurora can be programmed to alert you silently to an incoming message or you can choose from a range of audible alerts and melodies.

#### Faster Communication

The Aurora is connected to the PageOne network. You can rely on your message coming through in seconds because PageOne uses advanced satellite technology to send the message to transmitter sites across the country and through to you.

#### Easy To Use

To send a message, callers simply dial your pager number; they will automatically be connected to the PageOne Call Centre and asked to leave a message.

#### Product Features

- 2 line LCD scrolling display
- 20 message capacity - 100 characters per message
