

## Business LX2 Alphanumeric Pager

Communications on the move

### Ultimate Flexibility

With its 2 line, 40 character display and 4 large operation buttons the LX2 allows you to quickly and easily read, delete or save messages. You can store up to 20 messages in the pager's 1,200-character memory for future reference.

The LX2 pager is part of the TH Comms business product range.

### Greater Versatility

For ultimate discretion the LX2 can be programmed to alert you silently to an incoming message or you can choose from a range of audible alerts.

### Faster Communication

The LX2 pager can be connected to any network pending frequency. If you connect to the PageOne network, you can rely on your message coming through in seconds because PageOne uses advanced satellite technology to send the message to transmitter sites across the country and through to you.

### Easy To Use

To send a message, callers simply dial the 24-hour Paging Call Centre, quote your pager number and leave the message with the Call Centre operator.
