

Premier LX4 Alphanumeric Pager

Communications on the move

Ultimate Flexibility

The LX4 pager is part of the TH Comms business product range. The LX4 can receive messages of up to 240 characters in length and has a 4-line display, displaying 80 characters at a time. The 6,900-character memory can hold up to 20 messages, each one being automatically time and date stamped.

Greater Versatility

For absolute discretion the LX4 can be programmed to alert you silently to an incoming message or you can choose from a wide selection of audible alerts.

Faster Communication

The LX4 pager can be connected to any network pending frequency. If you connect to the PageOne network, you can rely on your message coming through in seconds because PageOne uses advanced satellite technology to send the message to transmitter sites across the country and through to you.

Easy To Use

To send a message, callers simply dial the 24-hour Paging Call Centre, quote your pager number and leave the message with the Call Centre operator.
